

Professional Summary

Senior Business Intelligence Developer with **8+ years of experience** designing, migrating, and optimizing enterprise-scale dashboards using Tableau and Oracle Analytics Cloud (OAC). Strong expertise in SQL, data modeling, ETL-supported analytics, data validation, and performance tuning. Proven ability to translate complex business and healthcare requirements into intuitive, high-impact visualizations that drive measurable outcomes. Experienced in Agile/Scrum environments, stakeholder collaboration, and mentoring junior team members.

Core Skills & Technologies

Business Intelligence & Visualization: Tableau Desktop, Tableau Server, Oracle Analytics Cloud (OAC), Interactive Dashboards, Executive Dashboards, Data Storytelling, UX/UI Design, Self-Service BI

Data & Analytics: Advanced SQL, PL/SQL, Data Modeling, Data Warehousing, ETL / ELT, Data Profiling, Data Validation, Data Quality, Advanced Analytics, Performance Tuning

Databases & Platforms: Autonomous Data Warehouse (ADW), Oracle, Vertica, Snowflake, SQL Server

Tools & Methodologies: Git Version Control, JIRA, Agile / Scrum, SDLC, Change Management

Automation & Scripting: Python (Basic), Excel

Governance & Compliance: Data Governance, Data Security, Regulatory & Compliance Reporting

Professional Experience

Senior Business Intelligence Developer
Oracle Cerner - Bangalore

Dec 2022 - Present

- Lead the end-to-end Tableau and OAC development lifecycle, including requirements gathering, data source configuration (published data sources, custom SQL, Snowflake, Vertica), dashboard development, deployment, and post-release optimization.
- Design and deliver enterprise-grade Tableau dashboards, from wireframing and UX design to production rollout and performance tuning.
- Translate complex business requirements into high-impact Tableau visualizations using filters, parameters, LOD expressions, table calculations, actions, and standardized KPIs.
- Build, optimize, and maintain Tableau-ready data models and ETL-supported datasets to enable scalable, self-service analytics.
- Develop and tune advanced SQL for Tableau extracts and live connections, improving dashboard performance and reducing refresh times.
- Transform and optimize 50+ Vertica and Snowflake datasets into ADW-standard SQL models to support efficient Tableau reporting.
- Lead Tableau and OAC dashboard migration initiatives, delivering 15+ OAC dashboards and ensuring functional parity, performance, and usability.

- Perform Tableau data validation, anomaly detection, and logic reconciliation, resolving 90+ critical calculation, aggregation, and data consistency issues.
- Optimize 20+ high-volume Tableau dashboards and datasets, significantly reducing query runtime and improving system reliability.
- Publish and deploy Tableau dashboards across 200+ client environments, ensuring usability, adoption, and stakeholder satisfaction.
- Partner with cross-functional teams to present Tableau-driven insights to senior stakeholders and support data-driven decision-making.
- Mentor junior analysts and developers on Tableau best practices, dashboard design standards, SQL optimization, and data quality guidelines.
- Worked on 350+ JIRA items (user stories, defects, investigations, patch backs), ensuring timely resolution and continuous delivery.
- Utilized Git for version control, maintaining code integrity, and facilitating collaboration among team members.

Senior Configuration Analyst
Cerner Corporation Ltd

Sep 2019 - Dec 2022

- Provided BI, analytics, and healthcare data consulting for Cerner Millennium and HealthIntent solutions across international clients.
- Designed SQL datasets, data models, and Tableau dashboards aligned with complex business and regulatory reporting needs.
- Led stakeholder discussions to gather requirements and translate business goals into clear, data-driven BI solutions.
- Performed current-state data analysis for 70+ clients, delivering insight-driven recommendations and outcome-focused action plans.
- Conducted data validation and regulatory compliance analysis for ACO, HEDIS, HCC, and CSV4 programs.
- Supported ETL processes, process automation, system testing, and data quality initiatives.
- Managed JIRA-based work queues, ensuring SLA adherence, documentation, and effective issue resolution.

Freelancer
Fiverr(idesignlabs)

Jun 2013 –Aug 2015

- Designed responsive web layouts using HTML and CSS, delivering user-friendly solutions for global clients.

Oracle PL/SQL Developer
HCL Technologies Ltd

Jul 2010 – Nov 2012

- Supported requirements analysis and implementation of enterprise banking and loan management systems.
- Developed PL/SQL programs, ETL routines, and data transformations between Oracle data marts and data warehouses.

- Implemented data masking, performance tuning, and legacy code enhancements for the Bank of Ireland.
- Collaborated with business analysts, QA teams, and stakeholders to deliver scalable, high-performing solutions.

Education

Master of Technology

Jul 2018 – Jun 2020

VTU

Computer Science Engineering – 85%

Bachelor of Engineering

Jul 2006 – May 2010

Anna University

Computer Science Engineering – 90%

Certifications & Accomplishments

Leading SAFe 6.0 Agilist

Certified by Scaled Agile on successful completion of Leading SAFe 6.0 Training

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional

Certified by Oracle for successful completion of Generative AI professional certification

YOU ROCK – Cerner Award

Received 3 “You Rock” awards for reducing the issues that occur during configuration changes, training the new associates.

BRAVO – Cerner Recognition

Received for going above and beyond in finding any discrepancies found during the Data Health Check Process.

Oracle 9i Certified

Certified by oracle on successful completion of Introduction to oracle 9i

Indian Institute of Banking and Finance Certified

Certified by IIBF on successful completion of the Basics of Banking Examination
